

IIE Skill Training Center as a constituent unit of IIE: Talent is innate, but skills are acquired. Skill training focuses on identifying, training and nurturing talent, in any desired field. The social emphasis on scholastic achievement leaves little room for appreciating the diversity of talent that could make a qualitative difference to the potential of the skilled workforce. The brief object with which the center is being set-up is not limited to imparting skills but trains people to build and enhance networking, time management, communication skills, personality development, planning and management, securing financial stability, etc. With the signing of Memorandum of Understanding (MoU) with Indian Institute of Entrepreneurship, the institute has successfully implemented four training programs in four different trade (i.e. Yoga Instructor, Sr. Associate Desktop Publishing (DTP), Office Assistant and Squash and Juice Processing Technician) under PMKVY 4.0 in collaboration with Indian Institute of Entrepreneurship, Guwahati under the Ministry of Skill Development and Entrepreneurship, Govt. of India.
